- Extended Warranties and service alliance program for chillers and large gym units

Like many schools in Texas, **Boling ISD** has faced many difficulties related to their facilities. The administration and staff had to find a way to refocus efforts back to their student's education. It was time to fight the challenges, Boling ISD teamed up with Way Companies and utilized Way's program to minimize equipment breakdowns, reduce comfort issues, and ensure a healthy and safe learning environment.

After discussing and interviewing concerned staff members we (Way Companies) confirmed that we could implement an Energy Savings Performance Contract. The scope of the project included install of Hi-efficient T-8 lighting systems, upgrading all antiquated inefficient HVAC systems, and a laundry list of other improvements. We forecasted that Boling Independent School District

will save more than 3.4 million over the next 15 years.

Bryan Blahar, Asst. Superintendent, said, "The program has changed our district's financial situation. The project is generating \$274,900+ annually, which is funding the project and allowing us to upgrade the infrastructure of our facilities."

Boling ISD also received a \$45,974 incentive from CenterPoint Energy's SCORE Program which helps schools save energy and money. Way guarantees energy savings will provide long-term energy management and maintenance support so the district continues to benefit for years to come.

"Way provided a high quality product at an affordable price," BISD Superintendent Wade.
